Introduction to Google Docs

Course: Technical Writing Lab

Introduction

Google Docs is a web-based word-processing application developed by Google. It allows users to create, edit, format, and share documents online.

Features of Google Docs

1. Document creation and editing
2. Text formatting
3. Real-time collaboration
4. Automatic saving
5. Version history
6. Sharing and permissions

Conclusion

Google Docs makes document creation and collaboration easy. It is especially useful for students working on academic assignments and group projects.
